Surface

2,3,4-way **Extension Unit**

Application

The extension unit is used as a moveable CEAG socket outlet in Zone 1, 2, 21 & 22 surface areas.

Construction

The unit consists of a die-cast aluminium housing mounted to a steel frame. The larger housing has 4 Ceag socket outlets attached, while the smaller housing has 2 or 3 Ceag sockets attached.

Attached to the steel frame is a non-conductive carry handle. A 25 meter 2.5mm x 3 core Neoprene supply cable and Ceag plug.

A power indication LED pilot light is mounted on top of the lid.

Other cable types are available on request.
Other colours are available on request.
